Office Action Summary

Application No.

10/500,982

Applicant(s)

GAO ET AL.

Examiner

William C. Doerrler

Art Unit

3744

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-12 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 2-7 is/are allowed.
- 6) ☒ Claim(s) 1,8,9,11 and 12 is/are rejected.
- 7) ☒ Claim(s) 10 is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☒ The drawing(s) filed on 02 July 2004 is/are: a) ☒ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
- ☐ Certified copies of the priority documents have been received.
 - ☐ Certified copies of the priority documents have been received in Application No. ____.
 - ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☒ Information Disclosure Statement(s) (PTO/SB/08)
Paper No(s)/Mail Date 7-2-2004.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. ____.
- 5) ☐ Notice of Informal Patent Application
- 6) ☐ Other: ____.

DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pundak in view of Zhu et al '921.

Pundak discloses applicants' basic inventive concept, using a phase change to produce heat using pulse tube, substantially as claimed with the exception of using valves to control the phase change. Zhu et al '921 shows this feature to be old in the pulse tube art. It would have been obvious to one of ordinary skill in the art at the time of applicants' invention from the teaching of Zhu et al '921 to modify the pulse tube which can cool or heat using the phase difference of the gas to control the heat output of

Pundak by using valves to control the phase timing to improve control and enable different flows to different sections of the system.

Claim 9 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pundak in view of Zhu et al '921 as applied to claims 1 and 9 above, and further in view of Inoue et al.

Pundak, as modified, discloses applicants' basic inventive concept, a pulse tube that uses valves to control timing to enable cooling or heating, substantially as claimed with the exception of using a rotary disk with primary and secondary discs. Inoue et al shows this feature to be old in the pulse tube art. It would have been obvious to one of ordinary skill in the art at the time of applicants' invention from the teaching of Inoue et al to modify the pulse tube system of Pundak by using a valve with primary and secondary discs to enable variable timing of more than one gas stream.

Claims 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pundak in view of Zhu et al '921 as applied to claims 1 and 8 above, and further in view of Winkler.

Pundak, as modified, discloses applicants' basic inventive concept, a pulse tube that can cool or heat by changing valve timing, substantially as claimed with the exception of using the pulse tube to cool a cryopanel. Winkler shows this feature to be old in the cryogenic cooling art. It would have been obvious to one of ordinary skill in the art at the time of applicant's invention from the teaching of Winkler to use the pulse tube of Pundak as modified by Zhu et al in a cryopanel to enable efficient cryogenic cooling, which can now be regenerated by producing heat.

Allowable Subject Matter

Claim 10 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 2-7 are allowed.

Conclusion

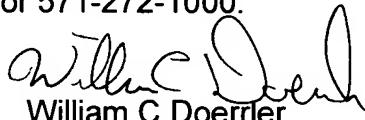

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Koyama et al show a rotary valve for pulse tube coolers. Zhu et al '469 and '902, Anderson Gao and Nogawa et al show pulse tube coolers with valves to control phase timing.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Doerrler whose telephone number is (571) 272-4807. The examiner can normally be reached on Monday-Friday 6:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
